Advanced Training in the Adult Attachment Interview - Week 4

This is the 4th week of the Adult Attachment Interview (AAI) course; it addresses serious clinical cases: personality disorders, psychoses, family forensic cases, violent criminality, psychopathy, sexual disorders, addictions, etc. In terms of discourse, various forms of lack of resolution of psychological trauma and loss, intrusions of forbidden negative affect, disorientation, and complex A/Cs will be covered.

A 8 DAY TRAINING LED BY

Andrea Landini and Clark Baim

April 1-8 2019

Brighton

Unit 6 the Old Sweet Factory 80 Stoneham Road Hove BN3 5HE

£900 +VAT (£800 +VAT until 31st January 2019)

The instructor, Andrea Landini, M.D. Dr. Landini is an experienced child and adolescent psychiatrist with a strong background in the DMM, cognitive psychotherapy, and family therapy. He is well published and co-authored *Assessing Adult Attachment and Attachment and Family Therapy*.

Enrollment is not guaranteed until payment is made. Payment must be complete before the course is begun. All payments are non-refundable.

Overview

This course teaches advanced discourse analysis for the Adult Attachment Interview (AAI), for very troubled individuals (in-patient, psychoses, personality disorders, criminality). It builds on the DMM methods taught in the 18-day course.

There is a requirement to submit 1 clinical AAI (not submitted to the 18-day course) and coding practice following the course. There is a reliability test following the course. This work must be completed to receive certificates for administering and coding AAIs. For more information, see www.familyrelationsinstitute.org.

Prerequisite

Course participants must have taken the 18-day [Adult Attachment Interview](#) course.
